

private residence
hove, uk

contract value £1.6m

EDWS was approached to undertake the full refurbishment of a Grade II Listed property. Working closely with specialist crafts people, the team carefully applied the latest environmental technologies alongside specialist conservation and restoration techniques (eg heat recovery/use of lime mortars, etc.).

A client that was committed to fully preserving/restoring a key seaside property back to its originally intended splendour. Restoration detail was reviewed for authenticity at every stage with client sparing little expense.

This project was successful recognised by winning the Sussex Heritage Trust Awards Small Scale Residential Category 2011.
